Summary
I am a software developer with a strong passion for backend development and a solid proficiency in Python, algorithms, and data structures. My experience includes API integration, web application development using frameworks like Django and Flask, and working with databases. With excellent problem-solving skills and a drive for innovation, I am actively seeking a full-time position where I can apply my technical expertise and contribute to a dynamic team environment.

Qualifications and Skills

Tech Skills
- Proficient in **Python**, algorithms and data structures. Object-Oriented Programming
- Experienced in using **APIs** to build and integrate third-party services into web and mobile applications
- Good work with design and development of presentation layer for web applications using technologies like **HTML**, **CSS**, and **JavaScript** with using **Bootstrap** and **Jinja**
- Good knowledge of developing, deploying, and configuring web App on servers like **Pythonanywhere**, **AWS**
- Proficient at writing SQL Queries and working with **MySQL**, **PostgreSQL**, **SQLite** databases
- Good experience of developing web applications implementing the MVC architecture using **Django**, **Flask** web application frameworks
- Hands-on experience with industry-standard IDE like **PyCharm**, **Jupyter Notebook**, and other software packages like **Microsoft Office** (including Word, Excel, PowerPoint), **Postman**, **Tableau, PowerBI**
- Experience of working with several Python libraries including **Pandas**, **SqlAlchemy**, **Matplotlib**, **Seaborn**, **Beautifulsoup**, **Selenium**, **requests,** etc
- Using **GitLab** and **GitHub** for managing source code in software development using **Git** version control
- Knowledge of user **authentication** and **authorization** process
- Familiar with **Docker** and its basic concepts, such as images, containers, and registries
- Expertise in UI/UX design, including proficiency in tools such as **Corel Draw** and **Figma**
- I am familiar with operating systems **Windows** and **Linux**, also with **PowerShell** Integrated Console

Soft Skills
- Ability to **work in a team**, as well as **independently**
- Effective **communication** and collaboration skills
- **Highly motivated** and **ambitious** to work in a fast-paced environment
- Ability to organize work according to project priority and **time management**
- **Willingness to learn** and eager to develop the necessary skills
- Excellent **problem solving** in the workplace, and personal situations, analytical thinking

Experience

Backend developer

Defend, Toronto, Canada   Oct 2022 – May 2023
- Working with a GIT control system, adding and updating changes to the GitLab project
- Manually testing requests and responses using Postman to verify API functionality
- Writing API technical documents with code examples and description
- Effective communication between members of the development team
- Experience developing apps using Django MVT (model, template, view) architecture

Education

Bachelor's Degree, Master's Degree

Khmelnytskyi National University, Khmelnytskyi   Sep 2014 – Dec 2019

Certifications

The Complete Python Pro Bootcamp for 2022, Udemy   Aug 2022
Back-end development on Django, Udemy   Dec 2022
